

Drill Pipe Float Valves

Cages made from hi-tech alloys.
 Coated with Xylan® - the most successful
 fluoropolymer coating in the world
 dramatically reduces corrosion and erosion.

Drillmax Float Valve Assemblies

Types Available

MODEL "F"
Plunger Type

Plunger type valve offers positive and instant shut-off. In normal drilling operations the Model "F" offers economy and durability. The piston type stops flow-back when making connections and keeps cuttings out of the drill string.

Standard Service - Pg. 3
Hi-Temp/NACE - Pg 5

MODEL "G"
Flapper - Full Flow

Flapper style valve features an investment cast flapper. It has quick opening for full flow through the valve. Designed for highly abrasive drilling fluids.

Standard Service - Pg. 3
Hi-Temp/NACE - Pg 5

MODEL "GA"
Flapper - Full Flow
with Carbide Orifice

Identical to the "G" except for a carbide orifice in the flapper. Allows differential pressure readings at surface.

Standard Service - Pg. 3
Hi-Temp/NACE - Pg 5

MODEL "GC"
Flapper - Full Flow
Automatic Fill

Identical to the "G" but adds an automatic fill feature when going in the hole. Helps prevent pressure surges that could cause formation breakdown.

Standard Service - Pg. 4

MODEL "GCA"
Flapper - Full Flow
with Carbide Orifice

Identical to the "GA" but adds the automatic fill feature.

Standard Service - Pg. 4

Float Valve Installation

Drillmax Drill Pipe Float Valves are easy to install. Simply lubricate the side seal rubbers and slide the float valve into the cavity of the recess of the float sub or drilled out drill collar.

CAUTION: Fill drill pipe regularly when going in the hole. Failure to do so can cause damage to the drill pipe and/or the float valves.

Drill Pipe Float Valve Subs
